

Amberg Engineering is a specialized engineering designer for underground structures. For more than 50 years, we have been developing solutions in the fields of underground railway, road and metro tunnels, caverns and infrastructure galleries.

We are looking for a

Metro Projects Manager

Job description:

The Metro Projects Manager is integral to the strategy of Amberg Engineering in the delivery of underground metro projects. Amberg Engineering intends to move into a leading role for the delivery of underground metro projects and has identified the need for a Metro Projects Manager to support this transition and grow this part of the business.

Your profile:

We are seeking a Metro Projects Manager who will need to be confident, with out-going personality with good visibility and strong credibility in the metros market. You will lead the preparation of proposals for underground metro projects and the delivery of underground metro projects. The projects could be based in a number of locations; initially LATAM and India are the targets of metro growth but countries in the ASEAN region will also be included based on the opportunities and the probability of success.

Requirements:

Degree in Civil, Structural or Geotechnical Engineering; at least 15 years in the design and supervision of underground metro (or similar) projects with at least 5 years in the role of Project Manager for an underground metro project (or similar).

Your work environment:

You will be based in the Amberg Infraestructuras SA offices in Madrid, Spain, one of the companies of the Swiss Amberg Group. You will depend on the Managing Director of Amberg Infraestructuras SA and will report project related to Managing Director of the office from which the project is being lead.

If you feel that this position would be a good fit for you, then please e-mail a complete set of application materials to job@amberg.es with the "Metro Projects Manager" reference in the email subject.
